

Flexible.

A conveying path only restricted by your imagination.

Introducing a new "direction" in materials handling solutions that will change your ideas about belt conveying.

The patented ICS can convey material at up to 80° as well as negotiate tight radius vertical and horizontal curves, eliminating the need for transfer points. The enclosed self cleaning belt prevents any dust, spillage or carry-back issues. With a wide variety of fixed or mobile mounting options, the ICS can be adapted to suit just about any conveying challenge.

For more information about these and other capabilities that make the ICS unique, call us on 08 9353 2400 or visit our website at: www.innovativeconveying.com
